**IN THE CLAIMS:**

Please amend the claims as follows:

1. (Currently Amended) A container assembly comprising a closure for an open-ended container, [and an open-ended container], the container assembly comprising:
  - (i) a flexible membrane for closing the open end of the container[.];
  - (ii) a seal [provided, in use of the closure,] between the flexible membrane and the [a] container; [and]
  - (iii) a rigid cap having a resiliently deformable member juxtaposed to the flexible membrane [in use of the closure, the resiliently deformable member,] such that when the cap is in use, [pressing] the flexible membrane is pressed against the container in the vicinity of the seal, thereby
